

# fodder raw materials safety policy

Kaolin EAD is a specialized producer of a fodder material calcium carbonate. The company manufactures, transports and distributes the products produced.

Kaolin EAD has the necessary technological and measuring equipment, which it maintained in a good technical condition. The products are manufactured under a strict control according to the requirements for European quality and hygiene of fodder.

Kaolin EAD is developing successfully thanks to our constant striving to research and satisfy the requirements of our consumers.

In the modern market conditions - with increasing market competition and rising requirements, the management estimates that successful business and stable development are only

possible by the offering of quality and safe products that meet the demands of the consumers and the regulatory requirements.

In order to satisfy the requirements of our customers and to guarantee the provision of safe products in the food chain, the Company applies Fodder Raw Materials Safety Management System according to the requirements of ISO 22000: 2018, based on the principles of Hazard Analysis and Critical Control Point.

Our aim is to produce the fodder raw materials under perfect hygienic conditions and strict sanitary control with competent staff. The management of the Company sets specific measurable goals for the achieving the policy for safety of the produced fodder raw materials.

The Company recognizes the

importance of the food safety in all aspects of the food chain as an ongoing process, also including the production of fodder, is committed to specific goals to achieve the applicable requirements of the regulations, and mutually agreed customer requirements.

The policy has been introduced and announced at all levels of the Company, as well as to the parties interested. A documented procedure is provided for the appropriate exchange of information regarding the policy, the Hazard Analysis and Critical Control Point system and the safety of fodder materials.

The management of the Company reviews the defined and declared policy for its continued suitability and updates it, if necessary.
